

One Stop EV Charger Solution

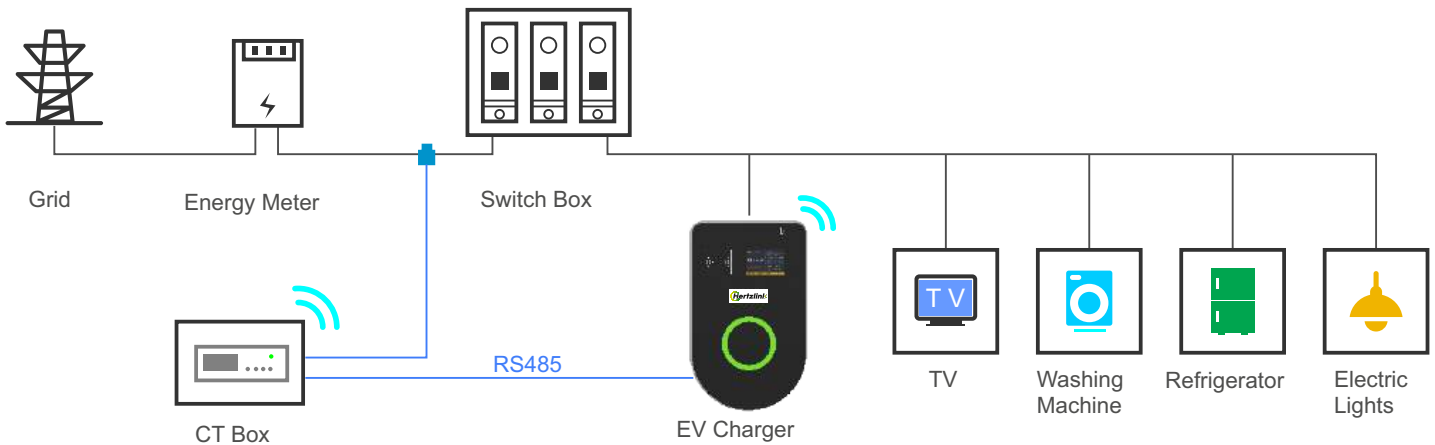

Our solutions for home use

Dynamic Load Balance

Dynamic Load Balance is a smart charging feature which balances the distribution of the total available power between chargers and other loads within the building in real time. It not only protects appliances, but also ensures EVs are fully charged at the lowest cost.

CT box monitors the total energy consumption and reports to the management system. The system controls the charging power of each individual charger automatically to avoid overloading when chargers and other loads are being used simultaneously.

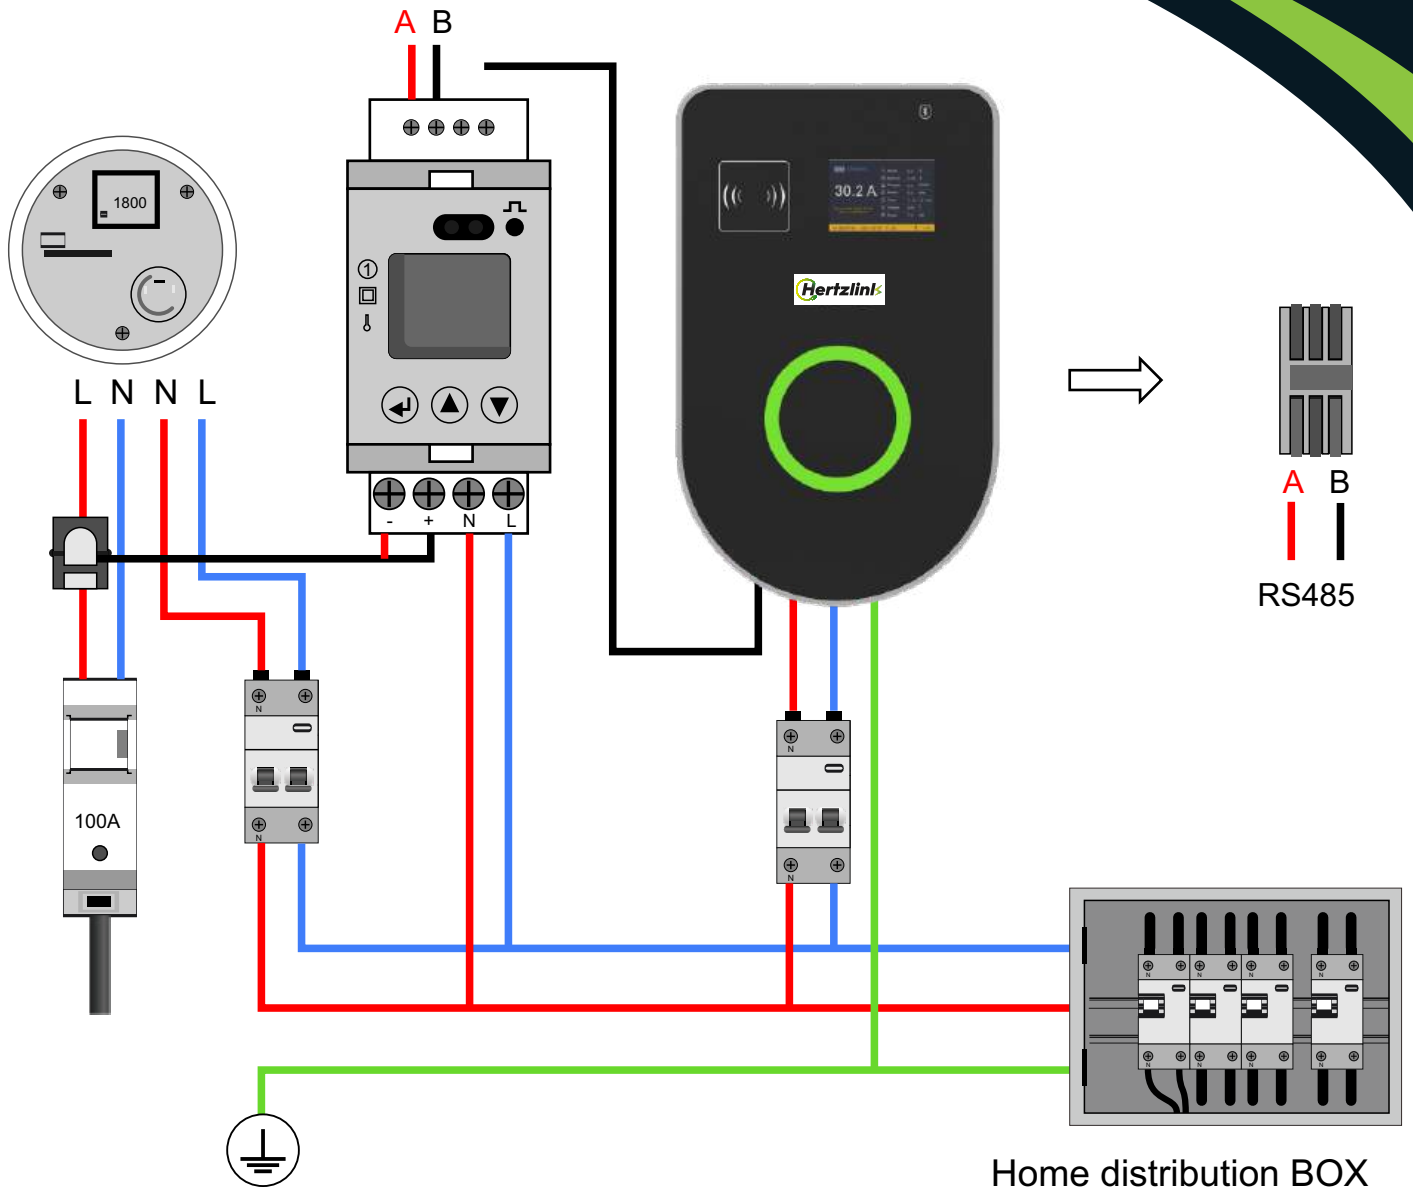

Static Load Balance

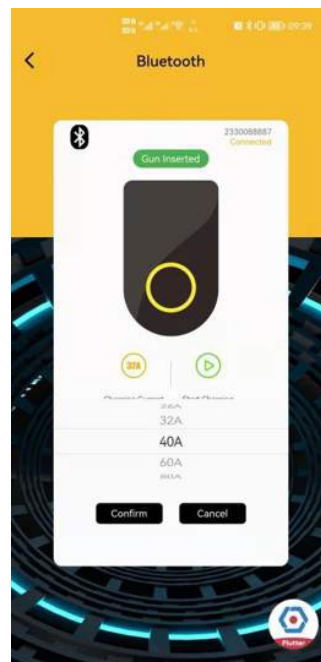

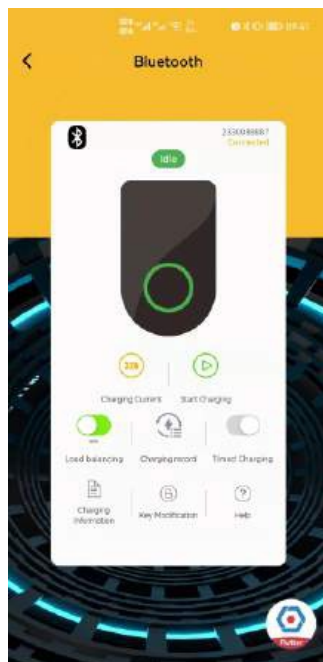

Static Load Balance is a smart charging feature which balances the distribution of the total available power for multiple chargers at a specific location. It enables you to set a maximum power for multiple chargers in the management system and distribute the charging power evenly between the individual active chargers.

Load balance helps you to protect the local grid within the capacity limit in peak hours of electricity consumption. EVs can charge with maximum power when possible, but the charging power will drop as more EVs begin to be charged simultaneously. For example, the parking lot has a maximum of 32A available. When the first EV charges, it charges at 32A - the maximum capacity. When more EVs start charging, the charging capacity will be distributed evenly over the EVs.

Our solutions for public

We provide everything that's needed to build a charging business, from charging facilities to customer services and smart energy management solutions. You can either manage your own network of charging station or provide the service for other charger operators. All solutions are white-labelled and can be customized to meet your customer's needs.

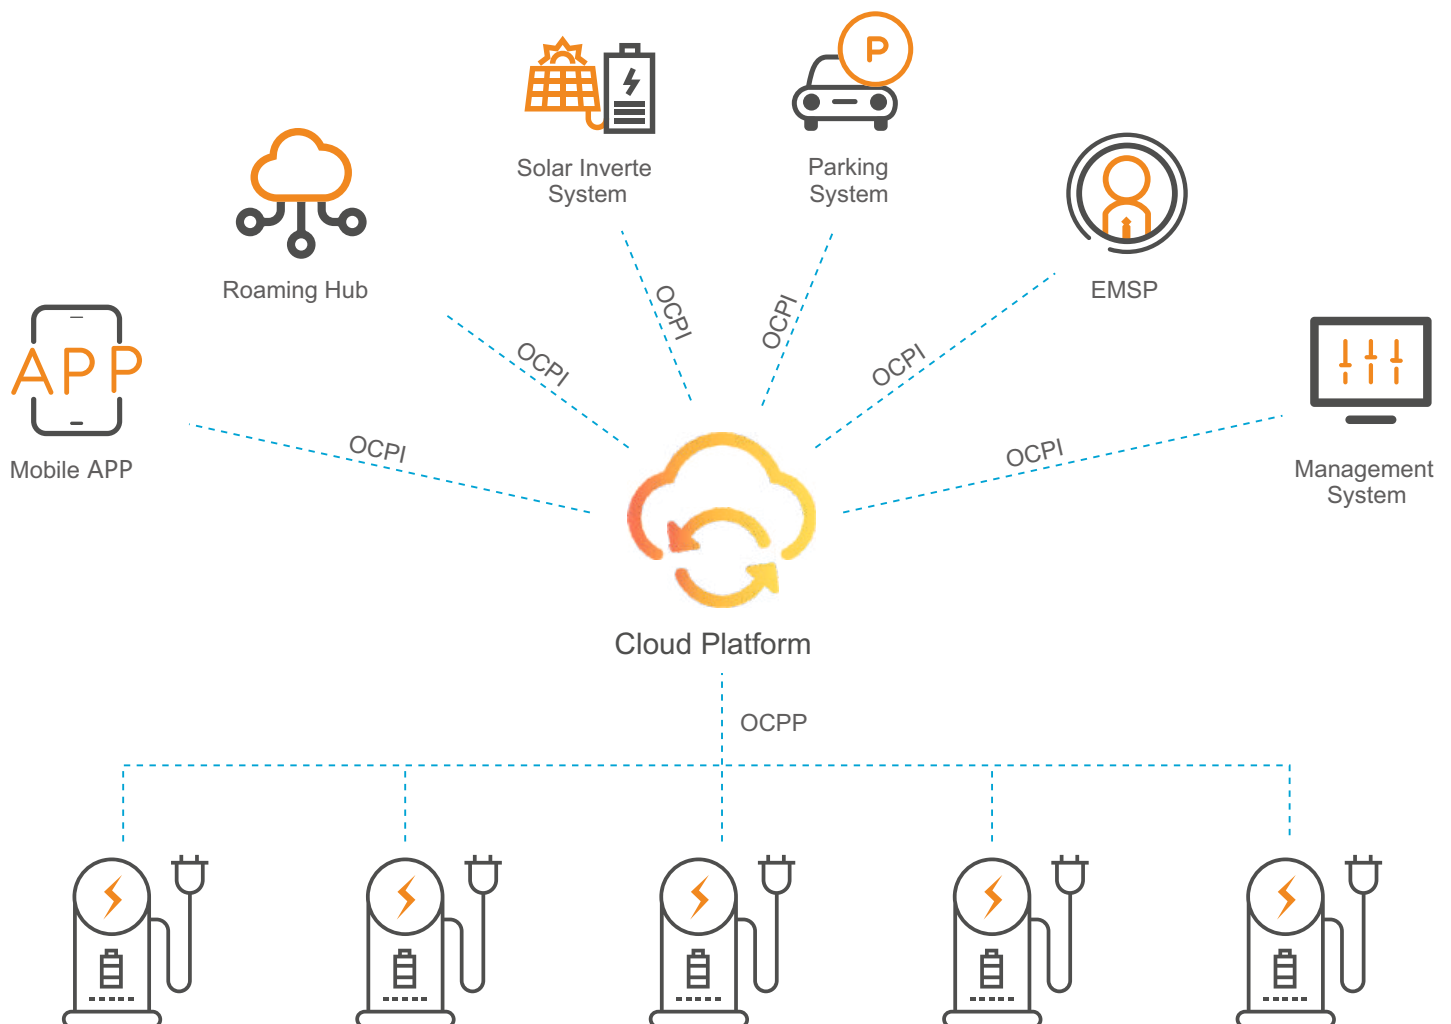

Cloud Platform

Dedicated to enabling the future of e-Mobility by providing the most open, secure and robust charging network anywhere. A charging platform based on the cloud server makes it simple for charger owners to operate and customize chargers to meet their specific requirements. We provide everything you need to offer a complete EV charging solution.

- ▶ **Management System:** A central system for charger operators manage charge points and monitor charging service. Status monitor, charger record, price management, firmware upgrade, remote diagnose, and load balance are offered in one capable system.
- ▶ **Mobile App:** A charging App for EV drivers who needs charging service. Price, locations, availability, start/stop charging, and auto billing are available in an easy way.
- ▶ **Interoperability:** Connections while e-Mobility Service Providers who have EV drivers as customers are viable through the open charge point interface protocol(OCPI)

Mobile App

The charging App connects EV drivers with charging station, so that they can easily find a charger and enjoy charging service. It enable users to do location search, charging monitor and payment settlement. All is done in a mobile phone.

Account Signup

Easy signup with a mobile phone number

Location Search

Quick search for available charging facilities

Charging Operation

Friendly interface and convenient operation

Real Time Monitor

Real time presentation of charging consumption

Cashless Payment

Mobile payment from credit card, like Nets, PayWay

Auto Billing

Secure billing through registered account

App Store

Google Play

1 Download the App and sign up an account.

2 Plug the charging cable into EV.

3 Scan QR code to start charging.

4 Stop charging in the App and settle payment automatically.

Portable AC EV Charger 230V 3.5KW/7.2KW

European Standard / AC EV Charger

Brief introduction

Plug and charge, charging is so simple.

EVC Link portable EV charger is specially designed for electric car owners to charge their car at home. This portable electric vehicle charger is safe, simple and smart. When you get home, you only need to connect the gun, the home electric vehicle charger automatically starts charging, and it automatically stops charging when it is full, which can guarantee your Electric cars start every day with full power

Energy storage series

WALL MOUNT

Y-storage is designed to be mounted as an aesthetic display on any indoor wall in your home and business.

SLEEK

Low profile and customizable with LED lighting.

APP CONTROLLED

Mobile app gives you visibility and control over your energy usage.

SCALABLE

Y-storage is expandable through supplement panel + units. The more units and add, the more resilient your power becomes.

SMART

Automatically stores energy when electricity is cheap and discharges power to any circuit in the house when the price rises, thereby lowering power bills.

SAFE

Automatically stores energy when electricity is cheap and discharges power to any circuit in the house when the price rises, thereby lowering power bills.

Twin Pedestal Series Cable

Innovativeness

One charger with two output sockets
Business use with intelligent App control
Vandal resistant and anti-corrosion

Intelligent Control

Ethernet/4G/Wi-Fi communication all supported
OCPP communication protocol with CMS
Intelligent operation by App and cashless payment

Flexible Option

App operation or RFID authentication or plug and play
Customization with different color painting

MINI DC Series

20KW-30KW-40KW the best charging station
For EV fast charger

Friendly interface

7-inch touch screen LCD and ring LED offer good user display requirements for charging.

Simple control

It is easy to control on and off through the Bluetooth function of the mobile phone APP and RFID Function.

Fast and Safety

40KW CCS type 2 plug, more efficient charging IP54 protection level of outdoor installation.

Wide application

Compliant with OCPP 1.6 and above enables it to connect to the global EV Charge management platform without additional integration and matching.

Super DC Series

90-150KW the best charging station For EV fast charger

High Efficiency

One charger with two outputs, simultaneously charging
Two CCS2 DC connectors, with output up to 150kW
Constant power from 250~1000V voltage, less heat with smaller current

Intelligent Control

Ethernet/4G/Wi-Fi communication all supported OCPP 1.6 communication protocol with CMS Intelligent operation by App and cashless payment

Accessories of Charging Mode3

Mechanical Properties

Mechanical life: no-load plug > 10000 times

Impact of external force : can afford 1m drop and 2t vehicle run over pressure

Electrical Performance

The rated current: 16A, 32A

Insulation resistance: > 1000M Ω (DC500V)

Withstand voltage: 2000V

The rated voltage: 250V

Pins temperature rise: < 50K

Contact impedance: 0.5m Ω Max

Applied Materials

Shell Material : thermo plastics, flame retardant grade UL94-V0

Pin : Copper alloy, silver

Environmental Performance

Operating temperature: -30°C ~ + 50°C

Features

- 1) Conform to the provisions and requirements of 62196-2 IEC 2010 SHEET 2-IIe
- 2) The product assembly conforms to IEC 61851-1 2010 charging mode 3 connection mode B2
- 3) Adopt no screw riveting pressure process, beautiful appearance, Hand-held design conforms to the principle of ergonomics, convenient plug and pull
- 4) Reliable materials, flame retardant, pressure resistance, abrasion resistance, impact resistance, high oil resistance
- 5) Excellent protection performance, IP 65 protection level of the plug (working state) high security
